A friend has a C128 and is looking for info on what is a
good TNC to use and what software is available to get on
the air. Any suggestions?

Subject: Desqview & Baycom or Poor Man's Packet?
To: packet-radio@ucsd.edu

I've gotten some recent mail about Desqview multi-tasking software for PC's... a 286 version for \$80 and a 386 version for \$130. Desqview is *not* a point-and-click GUI like Windows, but its multi-tasking is faster.

I have found that Poor Man's Packet won't run on my 20MHz 386sx under Windows 3.1, and I am trying to find out if anybody is running Baycom or PMP using Desqview as a multi-tasker. How well does it work?

(A local BBS in town uses Desqview as a part of running the F6FBBs BBS and I think that he (Jim) would swear by it... N9LNQ @ N9LNQ.IL)

Thanks in advance for responses and comments.

KB8CNE, Brad Banko

Hello all !

Is it possible to run KA9Q's NOS with a NE1000 Ethernet card and/or a DRSI packet radio adapter ? I haven't found any drivers for these cards.

Thank you in advance !
